Under no circumstances will IceStone LLC be responsible for the cost of other material or products in addition to the quartz surfacing which is the subject of this warranty, nor will IceStone LLC pay for the cost of fabrication, removal or installation of the defective product.

#### Exclusions

- A. This warranty does not cover damages caused by mishandling, misuse, and damage from excessive heat or uneven exposure to weather conditions physical or chemical abuse, chemical damage, or uses of products exposed to outside weather and climate conditions.
- B. This warranty does not cover damage or injury caused in whole or in part by acts of God, climate, job site conditions, architectural and engineering design, structural movement, acts of vandalism, accident, or war.
- C. Routine maintenance and minor conditions such as surface stains and water spots that may be corrected by following the techniques specified by the manufacturer are not covered.
- D. This warranty does not cover natural variations in the color, size, shape and distribution of the pattern of the natural quartz or the natural variations in background tone. These characteristics are inherent and unique characteristics of the product. Color samples provided to consumers, dealers and fabricators are only representative and not an exact replication of what will be installed.
- E. This warranty does not cover scratches. QuartzStone is a very hard material and highly scratch resistant but not scratch proof: proper care must be exercised.
- F. This warranty does not cover what is referred to as spots or blemishes smaller than a U.S. twenty-five (25) cent piece. A certain level of spots or blemishes are inherent in the manufacturing process and do not affect the structural integrity of the material.

- G. This warranty does not cover thermal shock, seam appearance and/or seam performance, improper, insufficient or poorly designed support, cabinets, structures or substrates for countertops. Once the product is installed, the main reasons for seam separation or cracking are the shifting or movement of the substrate, cabinets or foundation, and thermal shock. Thermal shock can occur when a hot pan, dish or other receptacle or object is left on the countertop for more than a brief period. Trivets or hot pads should always be used.
- H. This warranty does not cover any defects that were visible at the time of fabrication and were not avoided during fabrication. Fabricators are required to perform a visual inspection of all materials prior to fabrication and again prior to installation.
- I. This warranty does not cover failures due to fabricators/installers not following the prescribed fabrication and installation procedures as outlined by IceStone LLC, including, but not limited to, creative use of the material (e.g. bending, curving, milling, reducing thickness), securing mechanical fasteners directly into the material, dry cutting or polishing, altering of any factory applied finish, and not following the minimum requirements for edge details.
- J. This warranty does not cover additional modifications such as plumbing, electrical, tile, cabinets, flooring etc. that maybe necessary to repair or replace the QuartzStone products.
- K. HONED, BRUSHED AND TEXTURED FINISHES will require more daily maintenance than polished finishes. Since there is more exposed surface area with honed, brushed and textured finishes, metal marks, finger prints and other signs of daily living will be more apparent, especially on the darker colors. However, superficial marks like these can be removed with little effort and by using non-abrasive cleaning products such as Soft Scrub Liquid Gel with Bleach or Comet Gel and a Scotch Brite pad. Temporary marks that are inherent to the honed finish are not covered by this Warranty.
- L. This warranty does not cover additional modifications such as plumbing, electrical, tile, cabinets, flooring etc. that may be necessary to repair or replace the QuartzStone products.
- M. This warranty does not cover products installed in outdoors application.
